

2G-Blast – a new efficient blasting abrasive made from recycled CRT panel glass. Our 2G-Blast can be used to clean the body of ships and boats and other surfaces replacing traditional blasting abrasives.

Some of the advantages are:

- Very low and well defined Fe-content makes the material especially suitable for corrosion sensitive materials like stainless steel and aluminium.
- Higher cleaning speed compared to other glass abrasives.
- Harder than other glass abrasives (Mohs 7).
- Customized grain size 0,05-3000 µm.
- Environmentally friendly.
- Low dust content.
- Fully certified.
- Take back system for used blasting material available.
